

RBD-614

Instruction manual

EN

Alarm clock

Designated purpose of use of equipment

The device is intended for the reception and reproduction of sound, supplemented by the function of sound tone excitation by "radio", or radio and television broadcasting of audio from external sources of the device, to the extent determined by the technical and operational parameters and functions, safety and user instructions and external influences operating environment.

Orava electrical appliances are manufactured according to current state-of-the-art knowledge and recognized safety and technical rules. Still, it could be wrong and unprofessional use or use contrary to the intended use may endanger the life of the user or a third person, or equipment and other material values.

1.GENERAL SAFETY INSTRUCTIONS AND WARNINGS

- This document contains important safety instructions and warnings for safe, correct and economical operation of the electrical equipment. Its compliance helps the user avoid risks, increase reliability and product life.
- In this document, the generic term product is used in text parts such as: electrical equipment - any device used for the production, conversion, transmission, distribution or use of electricity.
- From the point of view of the purpose of using electricity, the concept of electrical equipment in the strict sense of the word will include the following categories:
 - household electric appliances,
 - information and communication equipment,
 - consumer electronics,
 - lighting equipment,
 - electrical and electronic tools,
 - toys and equipment for sporting and recreational

1.1 General safety instructions

- Before commissioning the unit, we recommend that you carefully read the operating instructions and operate the equipment in accordance with the instructions!
- The safety instructions and warnings in this manual do not cover all the possible conditions and situations that may arise when using the device. The user must understand that a factor that can not be incorporated into any of the products is responsibility and caution. These factors must therefore be ensured by users / users who use and operate this device.
- Failure to follow the safety instructions and warnings is forbidden by the manufacturer for any damage to health or property!
- Make sure that the appliance is complete and shows no signs of damage before using the appliance for the first time. If the product is defective or if it has any visible damage, do not use the product.
- Keep the operating instructions as close to the device as possible throughout its service life. Always keep the operating instructions together with the appliance for future use and use by new users.

- Use the appliance only for the purpose for which it is intended and in the manner specified by the manufacturer.
- The appliance is intended for home and similar indoor use, with no special focus.
- It is not a professional device for commercial use.
- Do not change the technical parameters and features of the device by unauthorized modification or modification of any part of the device.
- The manufacturer is not responsible for damages caused during transportation, misuse, damage or destruction of the equipment due to adverse weather conditions.

1.2 Safety of the operating environment

- Do not use the device in an industrial environment or outside environment.
- Always keep the operating environment clean and well lit.
- Do not place the device on an unstable surface. Overriding or dropping the device may result in personal injury or damage to the device.
- Do not expose the unit to direct sunlight or excessive heat sources.
- Do not use an electric appliance in areas with flammable liquids, gases or dust. The appliance may be the source of scaling, which can result in the ignition of dust or vapors.

Features of the operating environment

1. Ambient temperature: $+5 \div +40$ ° C
 2. Humidity: $5 \div 85\%$
 3. Altitude: $\leq 2\ 000$ m
 4. Occurrence of water: intermittent condensation of water or occurrence of water vapor
 5. Occurrence of foreign bodies: amount and type of dust are not significant
Protection class: IP20
- Other characteristics of the operating environment (mechanical stress - shocks and vibrations, occurrence of plant, animals, weather effects) are negligible in terms of effect on the correct and safe use of electrical equipment.

1.3 Electrical safety

- Before connecting the appliance to the power supply for the first time, make sure that the voltage on the appliance label corresponds to that of the household electrical outlet.
- The electrical appliance is designed for mains supply 230 V ~.
The electrical safety of the appliance is guaranteed only if it is properly connected to the electricity grid.
- Only use a power cord with a plug (mains lead) that came with the device and compatible with a wall outlet. Using another cable may result in fire or electric shock.
- Always connect an electrical appliance to an easily accessible power outlet. In the event of an operating fault, the appliance must be switched off as soon as possible and disconnected from mains supply.
- Do not pull the power cord / power cord by pulling on the cord / cord. Disconnect the power cord by pulling the plug behind the power cord / power cord plug.
- If you use an extension cord, check that the total rated (ampere) power of all devices connected to the extension cord does not exceed the maximum current rating of the extension cable.
- If you need to use an extension cord or power supply block, make sure that the extension cord or power pack is plugged into a power outlet, and not to another extension cord or power supply. Extension power cord or power supply block must be designed for grounded plugs and plugged into a grounded outlet.

- The power plug of the appliance must be compatible with the mains socket. Never use any adapters or modify the socket in any other way. Do not use inappropriate or damaged sockets.
- To avoid electrical shock, plug the power cables into properly grounded electrical outlets. If the device is equipped with a 3-pin power supply cord, do not use adapters that do not have a grounding element or remove the grounding element from the plug or adapter.
- Do not bend, crush or otherwise expose the power cord / power cord of the appliance to mechanical stress or external heat sources. Damage to the power cord may result in electric shock.
- If the power cord is damaged, disconnect the appliance from the mains and do not use it again. If the power cord / power cord is damaged, it must be replaced by the manufacturer, its service department, or a qualified person to avoid the risk of electric shock.
- Regularly check and maintain the electrical appliance as well as the power cable. Disconnect the power plug regularly and clean it if necessary. Pollution by dust or other substances may cause disruption of the insulating state and consequently fire.
- Do not expose the appliance to water or moisture. The ingress of water into the appliance increases the risk of electric shock. If the power cord is wet or the appliance gets water, disconnect it immediately from the mains. If the appliance is plugged into a mains socket and if possible, turn off the power supply before attempting to disconnect the power supply. If you are pulling wet wires from a live power source, be very careful.
- If the electrical equipment is installed (connecting) the protective covers are dismantled, the electrical parts must not be accessible to the user when the installation is finished.

1.4 Safety of persons

- This appliance is intended for use by persons without an electrotechnical qualification (layperson) according to the instructions specified by the manufacturer.
- Device operation includes activities such as switching on and off, user manipulation and setting of operating parameters, visual or auditory inspection of the equipment, and user cleaning and maintenance.
- This appliance can be used by children 8 years of age and older and persons with reduced physical, sensory or mental abilities or lack of experience and knowledge only when under the supervision or guidance of the responsible person have been instructed to use the appliance in a safe way and understand the potential hazards
- Cleaning and user maintenance can be carried out by children 8 years of age and older only under the supervision of the responsible person.
- Children may not play with the appliance.
- Always keep the appliance out of reach of children during use and operation. Be sure to download the appliance even for a freely accessible power cord.
- Always be careful when operating the electric appliance. Do not use an electric appliance if you are overly tired, under the influence of medication or narcotic drugs that reduce attention and focus. Inattention during operation may result in serious injury.

1.5 Cleaning, maintenance and repairs

- Observe the normal user cleaning and maintenance of the appliance in the recommended way. Do not use solvents or harsh cleaners for cleaning. Pollution and visible stains from finger contact, respectively. The hands can be cleaned using detergent detergents specially designed to clean household appliances.
- If you do not use the appliance, clean it or disconnect the appliance from the power supply when the appliance is faulty.
- Do not disassemble the appliance. The appliance works with a dangerous voltage. For this reason, always switch off the appliance and disconnect it from the power supply. In the event of a fault, please have the repair serviced by an authorized service center.
- Only guarantee qualified and qualified personnel to repair and repair the electrical appliance.

2. Special Safety Instructions. Read carefully!

Electrical equipment is designed and manufactured in such a way as to allow for safe operation and use by persons without a professional qualification. Despite all the measures taken by the manufacturer to ensure safe use, handling and use, it carries with it certain residual risks and associated potential hazards. To warn of possible hazards, the following symbols and their meanings have been used on the device and in the accompanying documentation:

This symbol alerts users that the device is operating a dangerous electrical voltage. Do not remove protective covers on the device. Failure to observe the safety instructions during use and operation of the device may result in:

Danger of electric shock!
Danger of serious injury or life threatening!

This symbol alerts users to the following: Risk of serious injury or life threatening when not following the safety instructions when using and operating the unit!

Danger of damage to equipment or other damage to property!

This symbol means that the product is made with a double insulation between hazardous live parts (parts with dangerous voltage from the mains) and parts that are accessible in normal use.

Transport/Carriage

- When transporting and using, for example, of the transport cart, be careful when moving, to avoid overturning the device.
- Transport / carry the equipment only after thorough inspection of the space and the routes, which must be unobstructed.
- Never carry the machine while it is in operation. Do not carry the device while it is plugged into a wall outlet.
- Transfer the device firmly by both hands to the bottom edge of the base or fixed parts of the body.
- Make sure that your hands and equipment are not damp or slippery when carrying. There is a risk of serious injury or life threatening!
There is a risk of damage to the device!

Unpacking/Package

- Unpack the equipment (and accessories if equipped) before putting it into service and remove all parts of the packaging material, labels and labels. Store the packaging in a safe place, especially out of the reach of children and unaccompanied persons, or dispose of them safely.
- Clean the machine before commissioning as described in the „Commissioning“ section or „Cleaning and maintenance“.
- Never clean the device (and the remote control, if equipped) and the power cord with the plug in a way that could cause the cleaning liquid to drip into the device.
- Clean these parts with a slightly moistened cloth and wipe dry or let it dry.
- Only clean the appliance when the appliance is switched off and disconnected from the mains.
There is a risk of electric shock!
There is a risk of electrical short circuit!

Check/Commissioning

- We recommend performing both initial and subsequent regular machine inspections.
- Never use the appliance if it is incomplete, damaged, or any part of it has been damaged during use.
- Do not use non-original and incomplete parts of the device and its accessories.
There is a risk of serious injury!
There is a risk of damage to the equipment or other property damage!
- If the equipment has been transported and stored at low temperatures (eg in the winter) or excessive humidity, first leave it for about 1 - 2 hours „Acclimatize“ at room temperature to remove any moisture in the electrical / electronic parts that arises when the ambient temperature changes.
- Do not switch the device on or off by plugging in or pulling out the power cord from the AC socket.
- Always connect the appliance to the mains power supply when using it normally, then switch on the main switch.
- When you have finished using the appliance, turn off the main switch and then pull the cord out of the mains socket.
- Do not use the device if the main power switch does not work.
- The device is under dangerous voltage when the power supply is connected.
There is a risk of electric shock!

Location/Installation

- Only place the device on:
 - Straight, firm and stable pads - for tables and furniture parts, suitable for the location of audio / video equipment.
- Always make sure that the place where you want to place the device has enough space, mechanical strength and load capacity.
- Do not install the equipment in the rooms (eg enclosed library cabinets, built-in cabinets and cabinets, etc.) for which there is insufficient room for space and ventilation.
- Leave enough free space around the device to ensure the required air circulation. It is recommended to keep min. 10 cm from all sides.
- Do not cover the appliance in part. Do not place any objects and / or decorative and other fabrics on the appliance, do not put and do not allow foreign bodies to enter the ventilation holes and holes in the housing covers.
- Do not cover the openings of the airflow covers. Air ventilation ensures reliable and safe operation of the device.
There is a risk of electric shock!
There is a danger of fire!

Warning!

- Do not expose the audio device (and the remote control if equipped) to:
 - direct sunlight, heat generating equipment,
 - vibration and mechanical stress,
 - excessive dust,
 - water and excess moisture,
 - insect,
 - an aggressive external environment.
- Do not set the audio device (and the remote control if equipped) to places where medical devices are used. Their function may be impaired.
 - for unstable carts, stands or tables,
 - to an uneven, unstable and dirty surface,
 - on the close edge of tables, tables or parts of furniture,
 - near containers with water or other liquids.
- Do not place containers of water or other liquids on shelves that are located above the machine.
- Do not place any objects, especially naked flame objects, equipment, or shelves that are located above the device.

Warning!

- Place the device in a place where children cannot reach freely.
- Prevent children from handling the device. The device may overwhelm children and cause serious injury.
- Mechanical damage (eg cracking of the plastic covers) of the device can cause serious injury.
There is a risk of serious injury!
There is a risk of damage to equipment or other property damage!
- Do not place or use the appliance near water-containing containers. If the appliance falls into the water, do not remove it! First, pull the power cord plug out of the mains socket and then select the appliance from the water. In such cases, take the device for inspection to a specialist service to check that it is safe and working properly.
There is a risk of electric shock!
There is a risk of electrical short circuit!
- Do not expose the device and its accessories to strong vibrations and / or shocks. Prevent anything from dropping or hitting objects.
There is a risk of serious injury!
There is a risk of damage to equipment or other property damage!
- Do not use the appliance in potentially explosive environments in the presence of flammable substances and their vapors, fog or dust, and under atmospheric conditions, which, when ignited, simply spreads through the air.
- Do not use the device near sources of excessive heat and open flame.
There is a risk of explosion and / or fire!

Operation/Supervision

Warning!

- To reduce the risk of electric shock, do not remove the device covers. There are no parts that can be repaired by the user inside the device. Obtain servicing to qualified service personnel.

Warning!

- Depending on the device model, there may be some options for switching the device off and on (or connecting and disconnecting) from the power supply. Therefore, always follow the following safety precautions carefully:
 - where the mains plug or the socket is used as a device to disconnect the power supply, this device must always be operable and easily accessible.
 - where the multi-pole power switch is used as a power-off device, this switch must always be operable.
- The power plug or the power switch fulfills the safety function of the device.

Warning!

- Do not use the device if the power switch does not work on the device or if the power plug is damaged.
- Complete disconnection of the device from the network is only ensured after disconnecting the mains plug from the mains socket.

Warning!

- The pushbutton (or slider) „ON / OFF“ switch on the control panel serves as „Functional On / Off“ of the device. When the switch is turned to „OFF“, the device is not disconnected from the power supply.
- The device is under dangerous voltage when the power supply is connected!
- Keep the device under supervision during use and operation.
- Never leave your device freely accessible and do not leave it with a freely accessible line cord and signal cables. Children, inappropriate persons or animals may be able to overturn the device by a power cord or signal cable.
- Ensure that all electrical wiring connections are secure and properly connected. If the power cord is not firmly connected to the device, be careful not to disconnect it from the device when the plug is plugged into a wall outlet. The free end of the power cord is under a dangerous voltage. Do not insert any conductive objects into the end cap.
- Do not connect the power cord and other cables to common bundles. The power cord must remain accessible for safe disconnection of the device from the power supply.
- Do not subject the power cord and signal cables to mechanical stress and damage. There is a risk of serious injury!
There is a risk of electric shock!
- The device contains parts of covers (eg ventilation grilles) that can be heated during normal operation. Do not touch these parts of the device.
- Unplug the power cord from the power socket if you will not be using it for a long time. Deposition of dust and humidity may cause electrical insulation to be impaired.
There is a risk of electric shock!
There is a risk of fire!
- Do not touch the equipment and power cord during strong storms. It could affect your electrical current from the atmospheric discharge. Disconnect the power cord from the wall socket during a storm or if you do not use it for a long time.

- Disconnect the appliance from mains supply if children or unaccompanied persons are left unattended near the device.
There is a risk of serious injury!
There is a risk of electric shock!
- Do not store the appliance with a wrapped cord around its body. Unfold the cord in the way it was folded in the original packaging by the manufacturer.
- Never overload the equipment beyond the limits specified by the technical specifications!

Warning!

- Avoid overheating and overloading when using the unit.
- If you notice any unusual occurrences (sounds, odors, smoke,...), immediately switch off the device and unplug it from the mains. Have the appliance checked by a specialist workshop.
- If the device is also equipped with the headphones to reproduce the audio signal: Do not use earphones set to extreme sound pressure levels.
Risk of serious damage or hearing loss!
- If any safety component / part (mechanical, electrical / electronic) is part of the device, never disable this part / component! If the safety part / component is damaged or not working, do not use the appliance!
- Never underestimate the potential hazards and take extreme caution !!!

Power sources/Batteries/Adapters

Safety instructions for replacing and disposing of the power supply - batteries.

Warning!

- When using electrical / electronic equipment that is equipped with a DC power supply - battery or accumulator, always observe the important safety instructions and cautions when operating and handling these sources.

Warning!

- Never recharge batteries!
- Never disassemble batteries!
- Never heat or throw batteries into a fire!
- Failure to observe the safety instructions could result in: Risk of serious injury!
Danger of explosion!
Chemical hazard!
Risk of damage to equipment or other property damage!

Warning!

- The device is equipped with a power source that can be replaced by users - batteries.
- Danger of electric shock, explosion, electrolyte leakage, burns may result from improper replacement and handling.
- Dispose of batteries according to the applicable regulations and regulations for the disposal of electronic devices.

Warning!

- Always store batteries out of reach of children, incapacitated persons and pets.
- Store used batteries carefully to prevent children from swallowing them and dispose of them as soon as possible. If swallowed, seek medical advice immediately.
- Use only the same or equivalent type of batteries specified by the manufacturer. Do not use new batteries with old ones. This may damage the device.
- Wipe the batteries with a dry cloth before inserting them. This ensures better electrical contact.
- Insert the batteries to match the "+" and "-" symbols on the batteries and on the inside of the unit cover.
- Do not handle batteries with metal tools (e.g. tweezers, etc.). Conductive contact of both battery terminals can cause a short circuit.
- It is recommended that you remove the batteries from the device when not in use. This protects the device from damage from leaking batteries. Should the batteries leak, have the device cleaned by an authorized service center.

Power sources

Power supply from the mains

The device is powered from the mains via an AC adapter into an electrical socket with the prescribed voltage of 230 V, 50 Hz. Plug the AC adapter into an electrical socket.

Backup power supply from the mains

The device is required to back up the power clock settings from two 1.5V AAA batteries (not supplied) (backup power) and at the same time only to the mains using a power cord. To power the device from the mains, connect the mains cord to the mains socket. The installation is powered by the following procedure (when powered only from the connection, in the event of a power failure, the display will not be turned on, but the time setting will not be reset, nor will the alarm clock and saved radio presets be reset):

- 1 Open the back cover of the battery compartment on the back of the device.
- 2 Insert 2 1.5 V AAA size batteries into the device. Observe the correct polarity + and - marked inside the compartment.
- 3 Close the battery compartment cover.

Notes

- Do not put any other objects in the battery compartment.
- If the device is not going to be used for a long time, remove the batteries to prevent possible leakage of the contents of the accessories and subsequent corrosion.
- Observe the correct + and - polarity. If the battery is stored according to the wrong polarity of the battery and the device itself.

Warning!

The AC adapter may only be replaced by an authorized person in an authorized service center. The device is under constant voltage as long as the AC adapter is in the electrical socket, even if the device itself is turned off.

Parts description

Control elements

The controls are located on the top of the devices:

- 1 **POWER/FUN** button (FM/AM, AUX band switch/switch)
- 2 **HOUR/TU-** button (Hour setting (H)/tuning down (-))
- 3 **MIN/TU+** button (Minute setting (M)/Tuning up (+))
- 4 Button **SNOOZE/SLEEP/HIGH/LOW/OFF** (Sleep timer (SLEEP)/Snooze (SNOOZE)/Display backlight intensity (HI/LOW/OFF))
- 5 **TIME SET/M+** button (Setting mode/confirm settings/save presets)
- 6 **AL1/VOL-** button (Alarm 1/Volume down (-))
- 7 **AL2/VOL+** button (Alarm 2/Volume up (+))
- 8 Output **USB connector** (Connecting devices to charge their batteries or power them with an output DC voltage of 5 V, 200 mA using a suitable cable (not supplied). Charging/powering from these connectors is possible only when this device is powered by an AC adapter from electrical network.)
- 9 **Headphone jack** (3.5 mm)
- 10 **AUX connector** (external audio source)
- 11 **DC connector** (Connecting the AC adapter (supplied))
- 12 LED display (time display, AL1, AL2, off timer, AM, FM radio, etc.)
- 13 Holder
- 14 Battery compartment with cover
- 15 Tilting stand
- 16 Wired FM antenna

General operations

Display

The display shows the time in 24-hour format, setting the time mode, alarm 1 and 2, sleep timer, radio band and tuning (tuned station).

Time setting

When the radio is off, the display shows the time. The time is displayed in 24-hour format.

Time setting mode by briefly pressing and pressing the TIME SET/M+ button (5) in radio off mode for approx. 1 second.

- 1 **Press and hold TIME SET/M+ (5) in clock display mode to activate setting mode. The display will flash.**
- 2 **In the time setting by pressing the HOUR/TU- (2) hour setting.**
- 3 **In the time setting by pressing the button MIN/TU+ (3) minutes.**
- 4 **After completing the setting, enter the TIME SET/M+ button (5) again.**

The setting mode is also canceled automatically if you do not use the toilet for about 4 seconds operations. They will save the settings.

Radio control

Basic operations

- 1 **Switch on the radio with the POWER/FUN switch (1).**

The FM band is switched on and the FM indication is displayed.

Press this button (switch) to select FM or AM band.

- 2 **Manual tuning:**

A short press of the MIN/TU+ button (3) tunes up.

For faster tuning, keep the button pressed after starting tuning. Once the nearest station is tuned in, tuning stops.

To continue tuning, press the MIN/TU+ button (3) again.

A short press of the HOUR/TU- button (2) tunes down.

For faster tuning, keep the button pressed after starting tuning. Once the nearest station is tuned in, tuning stops.

To continue tuning, press the HOUR/TU- button (2) again.

To store the tuned station in the memory, press and hold the TIME SET/M+ button (5).

A certain prefix number will appear on the display and will flash. The device allows you to store up to 10 presets in each band.

Use the **HOUR/TU-** (2)/ **MIN/TU+** (3) buttons to select the desired preset number from **P1** to **P20** and then briefly press the **TIME SET/M+** button (5). The tuned station is saved under the selected preset number.

- 3 To select and switch saved presets, briefly press the **TIME SET/M+** button (5) and select the desired preset number. Presets are sequentially switched from **P01** to **P20**.
- 4 Press the volume buttons **AL1/VOL-** (6)/ **AL2/VOL+** (7) to set the desired volume.

Listening to the radio

Extend the FM wire antenna to its maximum length, straighten it and adjust its direction for the best possible reception. Do not connect any external antenna to the FM wire antenna cable!

For the best reception in the AM band, try to change the position of the entire device so that the reception is of the best quality.

Turn off the device

Turn off the radio by pressing and holding the **POWER/FUN** switch (1).

Setting the alarm clock (ALARM)

The device is equipped with 2 alarm clocks. You can wake up to the sound of the radio or the sound of an alarm.

First, set the time on the clock correctly.

Alarm clock setting 1 - Buzzer alarm

- 1 In the clock display mode, press the **AL1/VOL-** (6) button once to select the buzzer alarm.
The **BUZZER AL1** buzzer light and alarm time display will flash.
- 2 Use the **HOUR/TU-** button (2) to set the required hours of the alarm time and use the **MIN/TU+** button (3) to set the required minutes of the alarm time.

Setting the alarm clock 1 - Wake up by radio

- 1 In the clock display mode, press the **AL1/VOL-** (6) button twice to select the alarm clock with radio..
The **RADIO AL1** (radio) light and the alarm time display will flash.
- 2 Use the **HOUR/TU-** button (2) to set the required hours of the alarm time and use the **MIN/TU+** button (3) to set the required minutes of the alarm time.
- 3 Press the volume buttons **AL1/VOL-** (6)/ **AL2/VOL+** (7) to set the desired volume.

Alarm clock setting 2 - Buzzer alarm

- 1 In the clock display mode, press the **AL2/VOL+** button (7) once to select the buzzer alarm.
The **BUZZER AL2** buzzer light and alarm time display will flash.
- 2 Use the **HOUR/TU-** button (2) to set the required hours of the alarm time and use the **MIN/TU+** button (3) to set the required minutes of the alarm time.

Alarm clock setting 2 - Wake up by radio

- 1 In the clock display mode, press the **AL2/VOL+** button (7) twice to select the alarm clock with radio.
The **RADIO AL2** light and the alarm time display will flash.
- 2 Use the **HOUR/TU-** button (2) to set the required hours of the alarm time and use the **MIN/TU+** button (3) to set the required minutes of the alarm time.
- 3 Press the volume buttons **AL1/VOL-** (6)/ **AL2/VOL+** (7) to set the desired volume.

Turning off the alarm

To turn off the alarm until the next day, press the **POWER/FUN** switch button (1). The alarm goes off and sounds again the next day at the set time. If you do not turn off the alarm, it will sound for about 30 minutes, then it will turn itself off and sound again the next day at the set time.

Activation/deactivation of the alarm clock function

In time display mode, press **AL1/VOL-** (6)/ **AL2/VOL+** (7) button repeatedly

Warning

The alarm clock can only be set when the clock is set correctly.

Snooze function

After setting the alarm, if the set wake-up time occurs and the radio sound or alarm sound starts to play, press the snooze button **SNOOZE/SLEEP/ HIGH/LOW/ OFF** (4) to temporarily turn off the radio or alarm sound.

The alarm light (AL) on the display will flash. If you do not perform any operation, after about 9 minutes the sound of the radio or the alarm will be activated again. This will be repeated 10 times.

Turn off the snooze mode by turning off the alarm clock by briefly pressing the **POWER/FUN** switch (1).

Timed shutdown function (SLEEP)

The device allows you to fall asleep while playing the radio sound.

- 1 Press the **POWER/FUN** switch (1) to turn on the radio.
- 2 Select or tune to the desired station.
- 3 Press the volume buttons **AL1/VOL-** (6)/ **AL2/VOL+** (7) to set the desired volume.

- 4 Press the SNOOZE/SLEEP/HIGH/LOW/OFF sleep timer button (4).**
The display will show 90 (minutes), which is the default period after which the radio will turn off. The sound will play for 90 minutes. The time will gradually count down and when 00 is displayed, the device will turn off.
- 5 If you want to adjust the time until turning off, SNOOZE/SLEEP/HIGH/LOW/OFF (4), press this button to reduce the desired time until turning off after 10 minutes (90, 80, 70, 6010, OFF).**
When set to OFF, the shutdown timer is disabled.
- 6 If you want to turn off the radio before the set turn-off time, simply press and hold POWER/FUN (1) to turn it off.**

Setting the intensity of the display backlight (DIMMER)

Long press the **SNOOZE/SLEEP/HIGH/LOW/OFF** button (4) to set the display backlight intensity (higher - lower - off).

From the factory, the intensity of the display is set to a higher brightness.

Charging other devices from the USB connector

There is a USB output connector (8) on the side of the device, which can be used to charge other USB devices. Use a suitable USB cable (not supplied) for charging. Connect one end to the USB connector on this device and the other end to the device being charged.

Notes

- When you want to use the USB charging connector, the device must be powered by the supplied AC adapter.
- The output USB charging connector of this device provides output specifications of 5V/200mA.

Listening to audio from an external device/AUX

- 1 Use the **POWER/FUN (1)** button to switch the device to AUX mode.
- 2 Connect the headphone output from another audio device to the AUX IN connector on the side using a suitable audio cable (not supplied).
- 3 Start playback on the connected external audio device and set the appropriate volume on it.

Maintenance

Cleaning the surface of the device

Use a soft cloth slightly moistened with water to clean the surface of the device, panel and controls.

Do not use rough cloths, cleaning powders, or solvents such as thinner, petrol, or alcohol. They can damage the finish.

Technical specifications

Tuning range:	FM: 87.5 - 108 MHz AM: 522 - 1620 kHz
Antennas:	wire FM antenna
Display:	Clock display (24-hour cycle), FM frequency and others
Power consumption:	10.5 W (AC adapter) / 5 W (device)
Audio output power:	1 W (mono)
Power supply:	220 - 240 V~ 50 Hz
Backup power supply unidirectional:	2x 1.5V AAA battery (not supplied - only to save settings)
Power supply AC adapter:	DC: 5 V, 2.1 A
Input connectors:	AUX IN (for external audio device)
Connectors output:	USB (for charging an external device 5V, 200 mA)
Dimensions (WxHxD):	19.5 x 9.8 x 2.8 cm
Weight:	0.22 kg (without batteries)

The right to make changes reserved!
